

## **Overview compact flame controller**

compact flame controller						
type		8.30	8.40	8.70		
part-no.:		S 511.3	S 511.4	S 511.7		
<b>fuels</b>	<b>with different loads</b>					
gas		x				
oil		x	x			
coal						
retention or waste				x		
combustion chambers						
H2S						
<b>type of operation</b>	<b>electromagnetic sensors</b>					
		fuel	flame	flame		
measured variable		pyrolysen-	temperature	temperature		
		radiation	radiation	radiation		
sensor		GaP - HL	Si - HL UV-E	S60 Th.		
wavelength [nm]		280 - 420	300 - 1050	1000 - 2700		
				(-7000)		
<b>amplification</b>	<b>modulation sensitivity</b>					
fixed						
automatic						
adjustable		x	x	x		
switch over						
<b>frequency range</b>	<b>modulation frequency range</b>					
band pass		x	x	x		
evaluation automatic						
<b>self checking function</b>	<b>electronic shutter</b>					
<b>optic</b>	<b>25 mm special lense</b>					
optical glass			x	x		
Quartz glass		x				
Calciumfluorid			( x )	( x )		
sight angle						
aperture						
<b>power supply</b>	<b>24 Vdc ± 20 % internal DC/DC coupled</b>					
<b>temperature range</b>						
-20°C to +60°C		x				
-20°C to +70°C			x	x		
<b>cooling</b>						
quantity of air				appr. 10 Nm³/h		
pressure				0,02 bar higher than furnace pressure		
velocity				appr. 8 - 10 m/s		
<b>mechanical dimensions</b>						
housing [mm]				appr. 235 x 108 x 165 (L x B x H)		
sighttube connection				1" - inner thread		
purge air connection				1/2" - inner thread		
weight				appr. 1 kg		
electrical connector				dust proofed connector		
protection				IP 65		
<b>output signal</b>	<b>0(4)...20mA / flame relay</b>					
<b>cable length</b>
